## I need a sign to advise and warn!

### We've got that...

Our LED signs are ideally suited for use as lighted warning or directional signs. They can function as an illuminated warning sign in medical facilities when medical imaging equipment is in-use or in testing and manufacturing facilities when dangerous equipment is engaged or hazardous vapors are present. Additionally, our indoor LED signs are perfect for any building that would benefit from illuminated in-use, wayfinding and informational signs such as office buildings, research labs and broadcasting studios.
