

# STRB Series

## Backlit LED, Blank-out Traffic Signs

### Let the STRB Be Your Guiding Light!

Our STRB Series signs are an excellent choice for traffic and parking authorities looking for durable signage that illuminates a message when needed and “blanks out” (disappears) when it’s not. These signs feature high-impact acrylic faces with an anti-glare coating, allowing for full graphic customization while increasing durability.

The messages of these signs are formed by illuminating high-intensity, super-bright LEDs contrasted against a black face. When the LEDs (available in white, blue, green, amber, and red) are illuminated, a message that is readable in direct sunlight and low-light conditions is created. When the LEDs are off, the sign’s face only displays only the black backdrop. STRB signs are controlled with a switch, Signal-Tech Sign Control Software (Smart Signs), or an external relay. And with the LEDs’ expected lifetime of 50,000 to 100,000 hours, you can rest assured your STRB sign will function flawlessly for years to come.

These signs will face extreme elements – rain, snow, snowmelt, humidity, dust, and temperature swings – so they feature a 1-piece, corrosion-resistant, extruded aluminum frame. The cabinet and sign components can operate at temperatures between -40°F and +165°F and humidity ranges from 0 to 99 percent and are IP55/NEMA 3RX rated. The sign cabinet comes standard with an electronically applied Quaker Macroflex Black finish, with custom paint colors available.

The STRB series is available in several sizes, many of which comply with MUTCD guidelines, and voltage options to fit your unique needs. Several mounting options are also available, including Lift’N Shift, Dual Angle Surface Mount, SkyBracket Mast Arm, and SkyBracket Span-Wire. Let the Directional Systems STRB Series be the guiding light of your safety and directional messaging!
