SBL Series Indoor Blank-out, LED Backlit Signs

SBL Series Indoor, Blank-out, Backlit LED Sign has a black face and only displays the message when illuminated. Units are backlit through a stencil cut, vinyl panel covered by a tinted protective face. Cabinet is 2.5" deep, extruded aluminum. Custom messages and flashing are available.

SBL Signs Ship in 3 Days

- Red, Blue, Green, Amber or White LEDs.
- Available in 120V, 12VDC or 24VDC. All products shown are 120V. Call for pricing on other voltages.
- Sign ships with our Lift'n Shift back for wall mounting.
- Ceiling, post and recessed mountings can be purchased separately.
- Control switch may be purchased separately.
- Standard cabinet finish Duranodic Bronze; custom paint finishes are available.

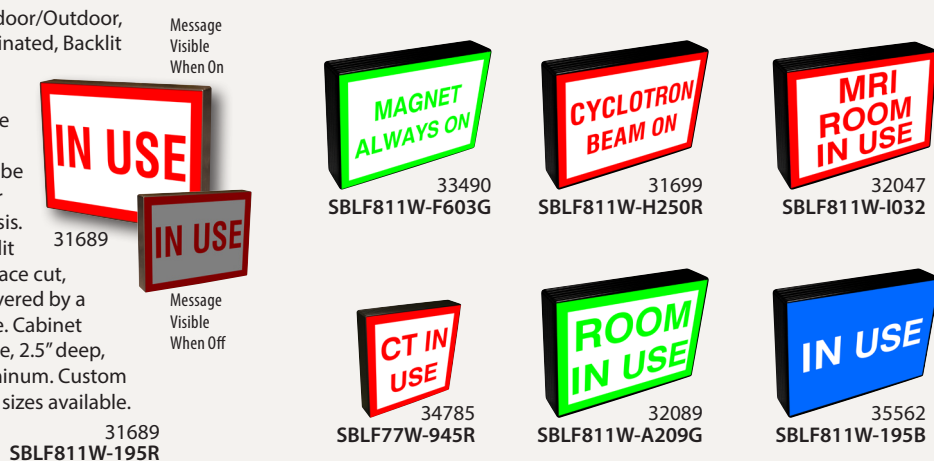

What is Full Face Illumination?
"Full Face Illumination" refers to illuminating the whole face of the sign. The message is always visible whether the sign is on or off.

What is Blank-out?
"Blank-out" refers to the signs ability to appear completely black when turned off. The message is only visible when turned on.

Custom Messages Available

SBLF Series Indoor/Outdoor Full Face Illuminated, LED Backlit Signs

SBLF Series Indoor/Outdoor, Full Face Illuminated, Backlit LED Sign has a white face with a message visible at all times and can be illuminated for added emphasis. Units are backlit through a surface cut, vinyl panel covered by a protective face. Cabinet is a single piece, 2.5" deep, extruded aluminum. Custom messages and sizes available.
