

Car Wash ***LED Signs & Light Tubes***

What are LED Car Wash Light Tubes?

Directional Systems' car wash Light Tubes are waterproof LED fixtures built to withstand high-pressure water, soap, and chemicals inside car wash bays. Combined with our pre-programmed controller, they create a light display that enhances the customer experience while improving visibility and safety. Durable, efficient, and eye-catching, they're essential to modern washes.

- Sealed housings for extreme water and chemical resistance
- Vivid colors for customer engagement and clear signaling
- Energy-efficient LEDs with long lifespan and low maintenance

System Components

LED Light Tubes **A**

Our LED Light Tubes can be used to replace old tubes or in new construction and feature two design styles. Linear Light Tubes are perfect for indicator lights or lighting entrance and exit perimeters. High-Power Light Tubes are designed to illuminate an entire wash bay with colored light. Both versions can flash or pulse via the control module and are available in multiple lengths.

Backlit LED Menu Boards **B**

Backlit LED menu boards create a clean, branded way to present car wash services.

- Display wash options and pricing
- Customizable: logos, colors, and shapes to enhance brand identity
- Durable construction ensures long-term performance

Backlit LED In-Bay Signs **C**

Directional Systems' in-bay LED signs provide clear lane guidance and branding while withstanding harsh car wash conditions.

- Bright prompts like stop, back up, and go keep traffic flowing
- Sealed housings protect against water, soap, and chemicals
- Long-lasting, superbright LEDs maintain visibility and minimize maintenance

Create a unique car wash with branded signs and Light Tubes!

Exterior LED Signage **D**

Exterior car wash LED traffic control signs deliver clear lane guidance while withstanding outdoor environments.

- Red-green lights, illuminated directional arrows, and enter/wait or Thank You blank-out messages clearly show customers when and where to enter the wash bay, ensuring smooth traffic flow
- Housed in corrosion-resistant extruded aluminum and UL/cUL-listed for wet locations, these signs are suitable for outdoor conditions while remaining readable even in direct sunlight
- Equipped with super-bright LEDs, solid-state circuitry, and a 5-year warranty, they're engineered for long life and minimal upkeep

Signage that Truly Shines.
