

STR Series LED Blank-out Traffic Signs

See the Light (or don't)!

The STR Series is our direct-view, LED blank-out signs for traffic and other outdoor applications. These signs are an excellent choice for single-purpose messaging: the LEDs are illuminated and create the sign's message when needed, and "blank out" or disappear when not. These signs feature a black message face and a protective 0.125-inch smoked, matte, impact-modified acrylic panel that provides anti-glare visibility and durability.

The messages of these signs are formed by illuminating high-intensity, super-bright, direct-view LEDs in a pattern (any number, letter, or phrase, and virtually any symbol can be created) against the sign's black face. When the LEDs (available in white, blue, green, amber, and red) are illuminated, the message is readable, even in direct sunlight. When the LEDs are off, the sign's face only displays only the black backdrop. STR signs are controlled with a switch, Signal-Tech Sign Control Software (Smart Signs), or an external relay. And with the LEDs' expected lifetime of 50,000 to 100,000 hours, you can rest assured your STR sign will function flawlessly for years to come.

These signs will face extreme elements – rain, snow, snowmelt, humidity, dust, and temperature swings – so they feature a 1-piece, corrosion-resistant, extruded aluminum frame. The cabinet and sign components can operate at temperatures between -40°F and +165°F and humidity ranges from 0 to 99 percent and are IP55/NEMA 3RX rated. The sign cabinet comes standard with an electronically applied Quaker Macroflex Black finish, with custom paint colors available.

The STR series is available in several sizes, many of which comply with MUTCD guidelines, and voltage options to fit your unique needs. Several mounting options are also available, including Lift'N Shift, Dual Angle Surface Mount, SkyBracket Mast Arm, and SkyBracket Span-Wire. The Directional Systems STR Series signs are a great choice when passersby need to see the light of illuminated safety and/or directional messaging (or don't)!
